DETAILED ACTION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 75-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cheah (6,586,280).

As for claims 75,78, the patent discloses a semiconductor packaging structure in figure 3 composed of an insulative substrate (120) having circuitry on its upper and lower surfaces, openings through its thickness, a die (112) adhered to the substrate by conductive epoxy resin (118) and connected to the bottom surface circuitry through the vias filled with conducting materials or electrical interconnects, and a metal layer (114) attached to the die. Although the terminologies used to describe device elements differ and expressions such as "board on chip" may be missing in the prior art, it would have been obvious to one skilled in the art to consider the expressional differences and arrive at the conclusion that both structures were similar both physically and conceptually since expressions are known to be subjective in the art that differ from an inventor to another.

The prior art further omits "flexible metal" to describe the metallic layers on the chip, however, it would have been obvious to one skilled in the art to use any type of metal on the structure of the prior art since no type of metal is excluded by the patent.

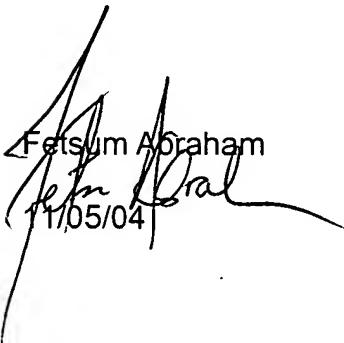

As for claims 76,77, there is a metallic layer (116) on the bottom surface of the chip and a conductive adhesive material (118) connects the metal to the substrate.

Claims 79-95 have been allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to PN: 6,229,227.
